

What is DLX?

Data Link Express (DLX) updates **Haver databases** in near real-time, and offers these data management features from your desktop ...

DLX View and Graph (DLXVG3)

- Easily view or print the data in table and graph formats.
- With one keystroke you can calculate growth rates and n-period moving averages, create log scales, recession shading and aggregations.
- Graphs create two independent scales that can be adjusted.
- Export graphs into Word 97 and Powerpoint 97 or higher.
- Print multiple graphs on a page.
- Help using DLX is available through the **Help** menu, or
- Help guides are also installed with DLX (haver\$(path)) on your computer under “DLX\HELP\Content”

Spreadsheet Add-ins

- DLX Add-ins to all versions of Excel provide instant updates of your spreadsheets.
- Using DLXVG3 to locate variable codes from within your spreadsheet, you can easily create new spreadsheets for analysis. e graphs on a page.

Database Compatibility

- The DLX software comes with a utility to convert the data to formats used by many different database managers and econometric packages.
