### 1:50,000 scale GSC Surficial geology maps series, 31G

#### General Description

The 1:50,000 scale digital GSC surficial geology maps series are available in E00 files. The files cover most of the 31G NTS number (31/G03, 31G/04, 31G/05, 31G/06, 31G/08, 31G/09, 31G/10, 31G/11, 31G/12, 31G/13, 31G/15 and 31G/16). The files contain a digital version of the previously released paper maps at a scale of 1:50,000. The information has been processed by the GIS Arc/Info and is released in E00 and DXF formats. Each ArcView Coverage folder contains the following: Point, Line and Polygon coverage folders.

#### Data Use Restrictions

Use of the Data is restricted to faculty, students and staff of Carleton University for study and teaching. A license agreement must be signed. The Geological Survey of Canada should be acknowledged on any derivative product, such as a map or an image.

#### Data Format

E00 or dxf file formats

#### Technical Details

Projection: Traverse Mercator, Zone 18

Datum: NAD83

#### Accessing the Data

The data files are available at the GSG. Consult staff for further information.

#### Citation Format

Author. Surficial geology, [map title], [map GSC serie A number], scale.
